Author Index for Volume 63 (2003)

Akhundov, I.S., *see* Balakrishnan, N.	(4)	435–440
Bairamov, I.G., *see* Eryılmaz, S.	(2)	123–131
Balakrishnan, N. and I.S. Akhundov, A characterization by linearity of the regression function based on order statistics	(4)	435–440
Balakrishnan, N., *see* Lien, D.	(3)	249–257
Bar-Lev, S.K. and D. Pommeret, A note on natural exponential families with cuts	(2)	215–221
Basu, R., J.K. Ghosh and R. Mukerjee, Empirical Bayes prediction intervals in a normal regression model: higher order asymptotics	(2)	197–203
Boshnakov, G.N., Confidence characteristics of distributions	(4)	353–360
Bosq, D., Berry–Esseen inequality for linear processes in Hilbert spaces	(3)	243–247
Chang, C.J., C.S.J. Fann, W.C. Chou and I.B. Lian, On the tail probability of the longest well-matching run	(3)	267–274
Chen, J., *see* Wei, L.	(2)	165–175
Chou, W.C., *see* Chang, C.J.	(3)	267–274
Christofides, T.C. and P.M. Mavrikiou, Central limit theorem for dependent multidimensionally indexed random variables	(1)	67– 78
de Ua-Álvarez, J., Large sample results under biased sampling when covariables are present	(3)	287–293
Draper, N.R. and F. Pukelsheim, Canonical reduction of second-order fitted models subject to linear restrictions	(4)	401–410
Durot, C., A Kolmogorov-type test for monotonicity of regression	(4)	425–433
Efromovich, S., On the limit in the equivalence between heteroscedastic regression and filtering model	(3)	239–242
Engel, H.-A. and C. Leuenberger, Benford's law for exponential random variables	(4)	361–365
Eryılmaz, S. and I.G. Bairamov, On a new sample rank of an order statistics and its concomitant	(2)	123–131
Fang, Z., D-optimal designs for weighted polynomial regression	(2)	205–213
Fann, C.S.J., *see* Chang, C.J.	(3)	267–274
Fernández, I.C. and I. Molchanov, A stochastic order for random vectors and random sets based on the Aumann expectation	(3)	295–305
Ferreira, H., Extremes of associated variables	(4)	333–338
Field, C.A., *see* Sinha, S.K.	(1)	49– 59
Frahm, G., M. Junker and A. Szimayer, Elliptical copulas: applicability and limitations	(3)	275–286
Frolov, A.N., On asymptotics of the maximal gain without losses	(1)	13– 23
Galambos, J. and I. Simonelli, Comments on a recent limit theorem of Quine	(1)	89– 95
Georgiou, S., C. Koukouvinos and P. Mantas, Construction methods for three-level supersaturated designs based on weighing matrices	(4)	339–352
Ghosh, J.K., *see* Basu, R.	(2)	197–203
Hall, A. and M.G. Scotto, Extremes of sub-sampled integer-valued moving average models with heavy-tailed innovations	(1)	97–105
Hawkins, D.M., *see* Olive, D.J.	(3)	259–266
Hili, O., Hellinger distance estimation of nonlinear dynamical systems	(2)	177–184
Hu, Z. and C. Su, Limit theorems for the number and sum of near-maxima for medium tails	(3)	229–237
Huang, W., A law of the iterated logarithm for geometrically weighted series of negatively associated random variables	(2)	133–143
Hueter, I., Geometric decay of infection probabilities for the anisotropic contact process	(4)	367–374
Junker, M., *see* Frahm, G.	(3)	275–286
Kim, H.-M. and B.K. Mallick, Moments of random vectors with skew t distribution and their quadratic forms	(4)	417–423
Kim, Y.T. and K.W. Lee, On a criterion of Riemannian distance for singularity and absolute continuity of probability measures	(2)	185–195
Koukouvinos, C., *see* Georgiou, S.	(4)	339–352
Lambert, P., *see* Vandenhende, F.	(2)	157–163
Lee, K.W., *see* Kim, Y.T.	(2)	185–195
Lemdani, M. and E. Ould-Saïd, $\mathscr{L}_1$-deficiency of the Kaplan–Meier estimator	(2)	145–155
Leuenberger, C., *see* Engel, H.-A.	(4)	361–365
Lian, I.B., *see* Chang, C.J.	(3)	267–274
